Do not forget the original ideals and aspirations to remember the mission, short eight words to our new era of young people new responsibilities and responsibilities. Keeping in mind the original ideals and aspirations is to warn young people to adhere to the truth, keep their promises, always remember their identity, conscientiously perform their duties and obligations, set a new image and set a good example with exemplary action.

There is no end to doing in practice. Young people in their twenties and thirties are the age of endless burst of vitality and passion. Young people should have "craftsman spirit", strive for excellence at the same time, and be a new generation of "craftsmen", constantly struggle and work hard. In addition to eagles and snails, it has no wings and can not run, all with pride and perseverance. Young people may not fly like eagles, but young people can, like snails, walk silently with their down-to-earth and unremitting efforts.

Walk in the forefront to seek a new article. A long journey begins with a small step, dare to seek a new article and write a new chapter. Young people should grasp the new situation, carry out new tasks, and keep up with the tide of the times. Only by constantly learning new ideas, mastering new policies and actively implementing various new principles can we be rich in creativity and not be disjointed and left behind in the new era of rapid development. The younger generation should have the courage to put forward more innovative ideas, give play to

the wisdom and talents of young people, and make good use of new tools such as new media networks to innovate and open up.

Brave tide head square show responsibility. Although there are inexperienced, improper weaknesses, but the younger generation has a newborn calf not afraid of tiger ruthless. Under the premise of studying the achievements and spirit of the predecessors, we should set the tide bravely and lead the new era and new direction. To carry out the spirit of the Nineteenth National Congress of the Party in depth, to take on the attitude of studying the new era and new ideas; to always be firm and persistent on the road, to take on the political stand of building a clean and upright spirit; To build self-confidence with the correct three views and to set an example for the younger generation.

In order to be an example for the younger generation, we must always remove the "dust" in our thoughts, refine the "cracks" in our quality, sweep the "dirt" on our bodies, and conscientiously stress morality and conduct. The task of Chinese Dream is entrusted to this generation of young people, young people must seize the opportunity to perform the best of themselves, always remember the responsibility and responsibility and constantly struggle.
